

SmartCare – simply better

#simplybetter

SmartCare

The premium class among car washes.
Made in Germany.

Can you make the world's most successful car wash even better? We can.

What does it mean when we say that our new car wash is 'smart'? Quite simply – that it sets a new unique standard in the car wash business. Because it is improved and optimised in many functions. Because it is so reliable and robust. Because it guarantees maximum availability. And because you can drive your car wash business to new heights with innovative solutions.

 WashTec

 WashTec

The smartest carwash in every dimension.

› **Smart, because of maximum availability:**

Monitoring, intelligent data acquisition and remote connection avoid downtimes.

› **Smart, thanks to remote access:**

Easily control all settings individually: whether pricing, chemical dosing or wash programmes.

› **Smart, because it offers maximum flexibility and freedom:**

Wash programme configuration, control and adjustments are easier than ever and can be perfectly customised to your car wash business at any time.

› **Smart, thanks to intelligent and efficient control:**

For maximum washing quality, speed and sales.

› **Smart, thanks to impressive performance in all 4 dimensions:**

Quality, Speed, Convenience, Look & Feel.

Smart.

Because it intelligently supports the car wash business.

Smart means breaking new ground. Monitor and control your car wash business individually at any time with remote access. Easy, convenient, fast, integrated. And above all, successful.

Remote control.

Imagine that you had comprehensive access to functions of your car wash at any time and from anywhere. Impossible? Not with WashTec SmartCare.

Thanks to remote access, you can easily monitor and control all settings individually: whether chemical consumption, pricing, chemical dosing or the wash programmes. Just as your car wash business demands.

The revolution in wash programmes

Remote access allows you to adapt your washing programmes to the current weather or the current workload. For example, with one click you can optimise the balance between best quality and highest speed according to the situation – simple and without expert assistance.

Always perfectly adjusted

WashTec SmartCare is the first car wash that you can easily adjust individually. Thanks to remote access/remote control, you can easily control the dosage of the washing chemicals with just one click – just as your car wash business requires. Or simply switch from summer to winter operation. Say goodbye to downtimes.

Always in the business

Via the Internet you are connected to your car wash from anywhere in the world – whenever, wherever, whatever you need.

Remote control

Smart.

Because it doses
chemicals perfectly.

For the rest of the industry, once set, the same washing chemicals are always dosed the same way, regardless of the washing situation. That was yesterday. WashTec SmartCare enables intelligent dosing, perfectly tuned to the desired washing process.

Chemical dosing.

Poor washing results are often caused by too little chemical.

The first car wash that doses individually

Whether for normal or problematic zones on the vehicle: WashTec SmartCare automatically doses the washing chemicals more efficiently and adaptably than ever before. Where they are needed.

The first car wash that perfectly monitors the washing chemicals

The fill level indicator allows the chemicals to be perfectly monitored and reordered in good time. This avoids incorrect dosages or running on empty due to a lack of washing chemicals. With remote access you can easily switch remotely from summer to winter operation. Or you can just as easily set the appropriate amount of washing chemicals for specific areas on the vehicle.

The first car wash whose settings you can easily customise

Thanks to remote access, you can conveniently control the dosing of the washing chemicals depending on the programme with just one click. In line with your car wash's current requirements.

Smart.

Because it can be operated
without expert knowledge.

Remember the times when every change to the settings of your car wash meant one thing above all else: effort and insider knowledge?

WashTec SmartCare marks the dawn of a new era: more simplicity, more convenience, more efficiency for your business.

WashTec

Adaptive control.

With WashTec SmartCare you can control your car wash easily and individually depending on the workload. Your customers benefit from more flexibility and you increase throughput at peak times – for more sales.

Become an expert – in no time. Because you can tune your desired wash programmes as required at the touch of a button.

Magic formula QBS

QBS stands for Quality Balanced Speed. And means that you can conveniently set each wash programme and wash step. Without effort, without technicians, without expert knowledge.

This allows you to adapt your WashTec SmartCare ideally to the season or even to daily peak times. And get the most out of your car wash.

All functions can be controlled and adjusted via remote access. Today's car wash business couldn't be simpler.

Smart.

Smart because intelligent sensors ensure precise control.

Hatchbacks, rear spoilers or hard-to-reach places on SUVs and other vehicles were often not properly cleaned. The improved sensor technology guarantees precise control. Problem solved: WashTec SmartCare sets the standard with improved FlexControl and MultiFlex.

Brush wash

Brush wash.

FlexControl 2.0 – perfect brush control for every side contour

The SofTecs side brushes are controlled via an improved sensor-based control system in combination with an infinitely variable tilting position. In conjunction with an optimally matched brush diameter, this allows a high feed-in angle of the lateral contour to be achieved with optimum contact pressure - from the roof edge to the sill. FlexControl 2.0 is simple, effective and delivers excellent washing results.

MultiFlex 2.0 – the brush that washes the rear at an angle

Enhanced sensor and control technology makes it possible. The multi-dimensional side brush adapts flexibly to the slanting rear. With separate swivel axes, the MultiFlex side brushes wash with perfect contact from the rear of the vehicle to the C-pillar.

The result:

Better rear cleaning, high customer loyalty and more sales for you.

Smart.
Because it excites
your customers.

Spectacular foam experience

WashTec SmartCare combines the best chemicals with perfect foam application for a real show experience. For excellent washing results and excited, loyal customers.

Pre-wash

Pre-wash.

Perfection is when the best washing chemicals, innovative technology and a spectacular washing experience come together.

Perfect washing results

Thanks to the swivelling spray nozzles, WashTec SmartCare ensures the optimum alignment and that the foam is applied more evenly across the entire surface, both on small and large vehicles. At the same time, high performance washing chemicals guarantee outstanding washing results.

Perfect washing experience

With FoamSensation, you can offer your customers a spectacular foam experience. FoamSensation covers the vehicle with a closed, colour illuminated foam curtain – a real customer magnet.

Easy to maintain

The “Quickfit” spray nozzles are easy to maintain without tools and effort and always remain in the perfect position.

Smart.
Because it's ground-breaking
in every way.

Form follows function – is the credo of modern design.
WashTec SmartCare is also ground-breaking in this regard.
Combining form, function and individuality in a unique way –
it adds a new dimension to your car wash business.

Design.

Diversity that stands out

Attract and inspire your customers with the 3D design and array of colours, which you can choose from the factory. And if you want to offer your customers something special, you can design WashTec SmartCare according to your individual requirements.

3D makes all the difference

The modern 3D design of the angled fronts is inviting and immediately catches the eye. This is how you attract customers.

High-quality glass

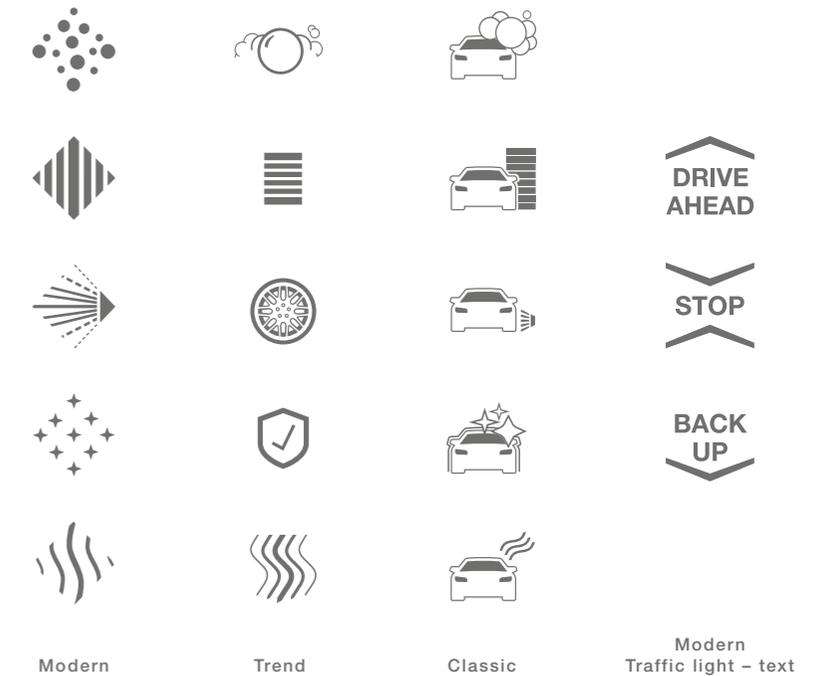

The high-quality safety glass is back-printed and resistant to chemicals, easy to clean and durable. In addition, the LEDs are protected behind the glass.

Nice, safe and attractive

It's nice when your customers are guided into the car wash in a friendly and modern way. Even nicer if they also experience a new sense of safety thanks to the extra washing width. And the nicest thing for you is when the exceptionally attractive design and guidance system bring new customers to your car wash.

Design

High pressure

Smart.

Because it washes
with absolute precision.

Are dirty vehicles with rugged surfaces a problem?
No, these are simply challenges that WashTec SmartCare
tackles with high pressure.

WashTec SmartCare

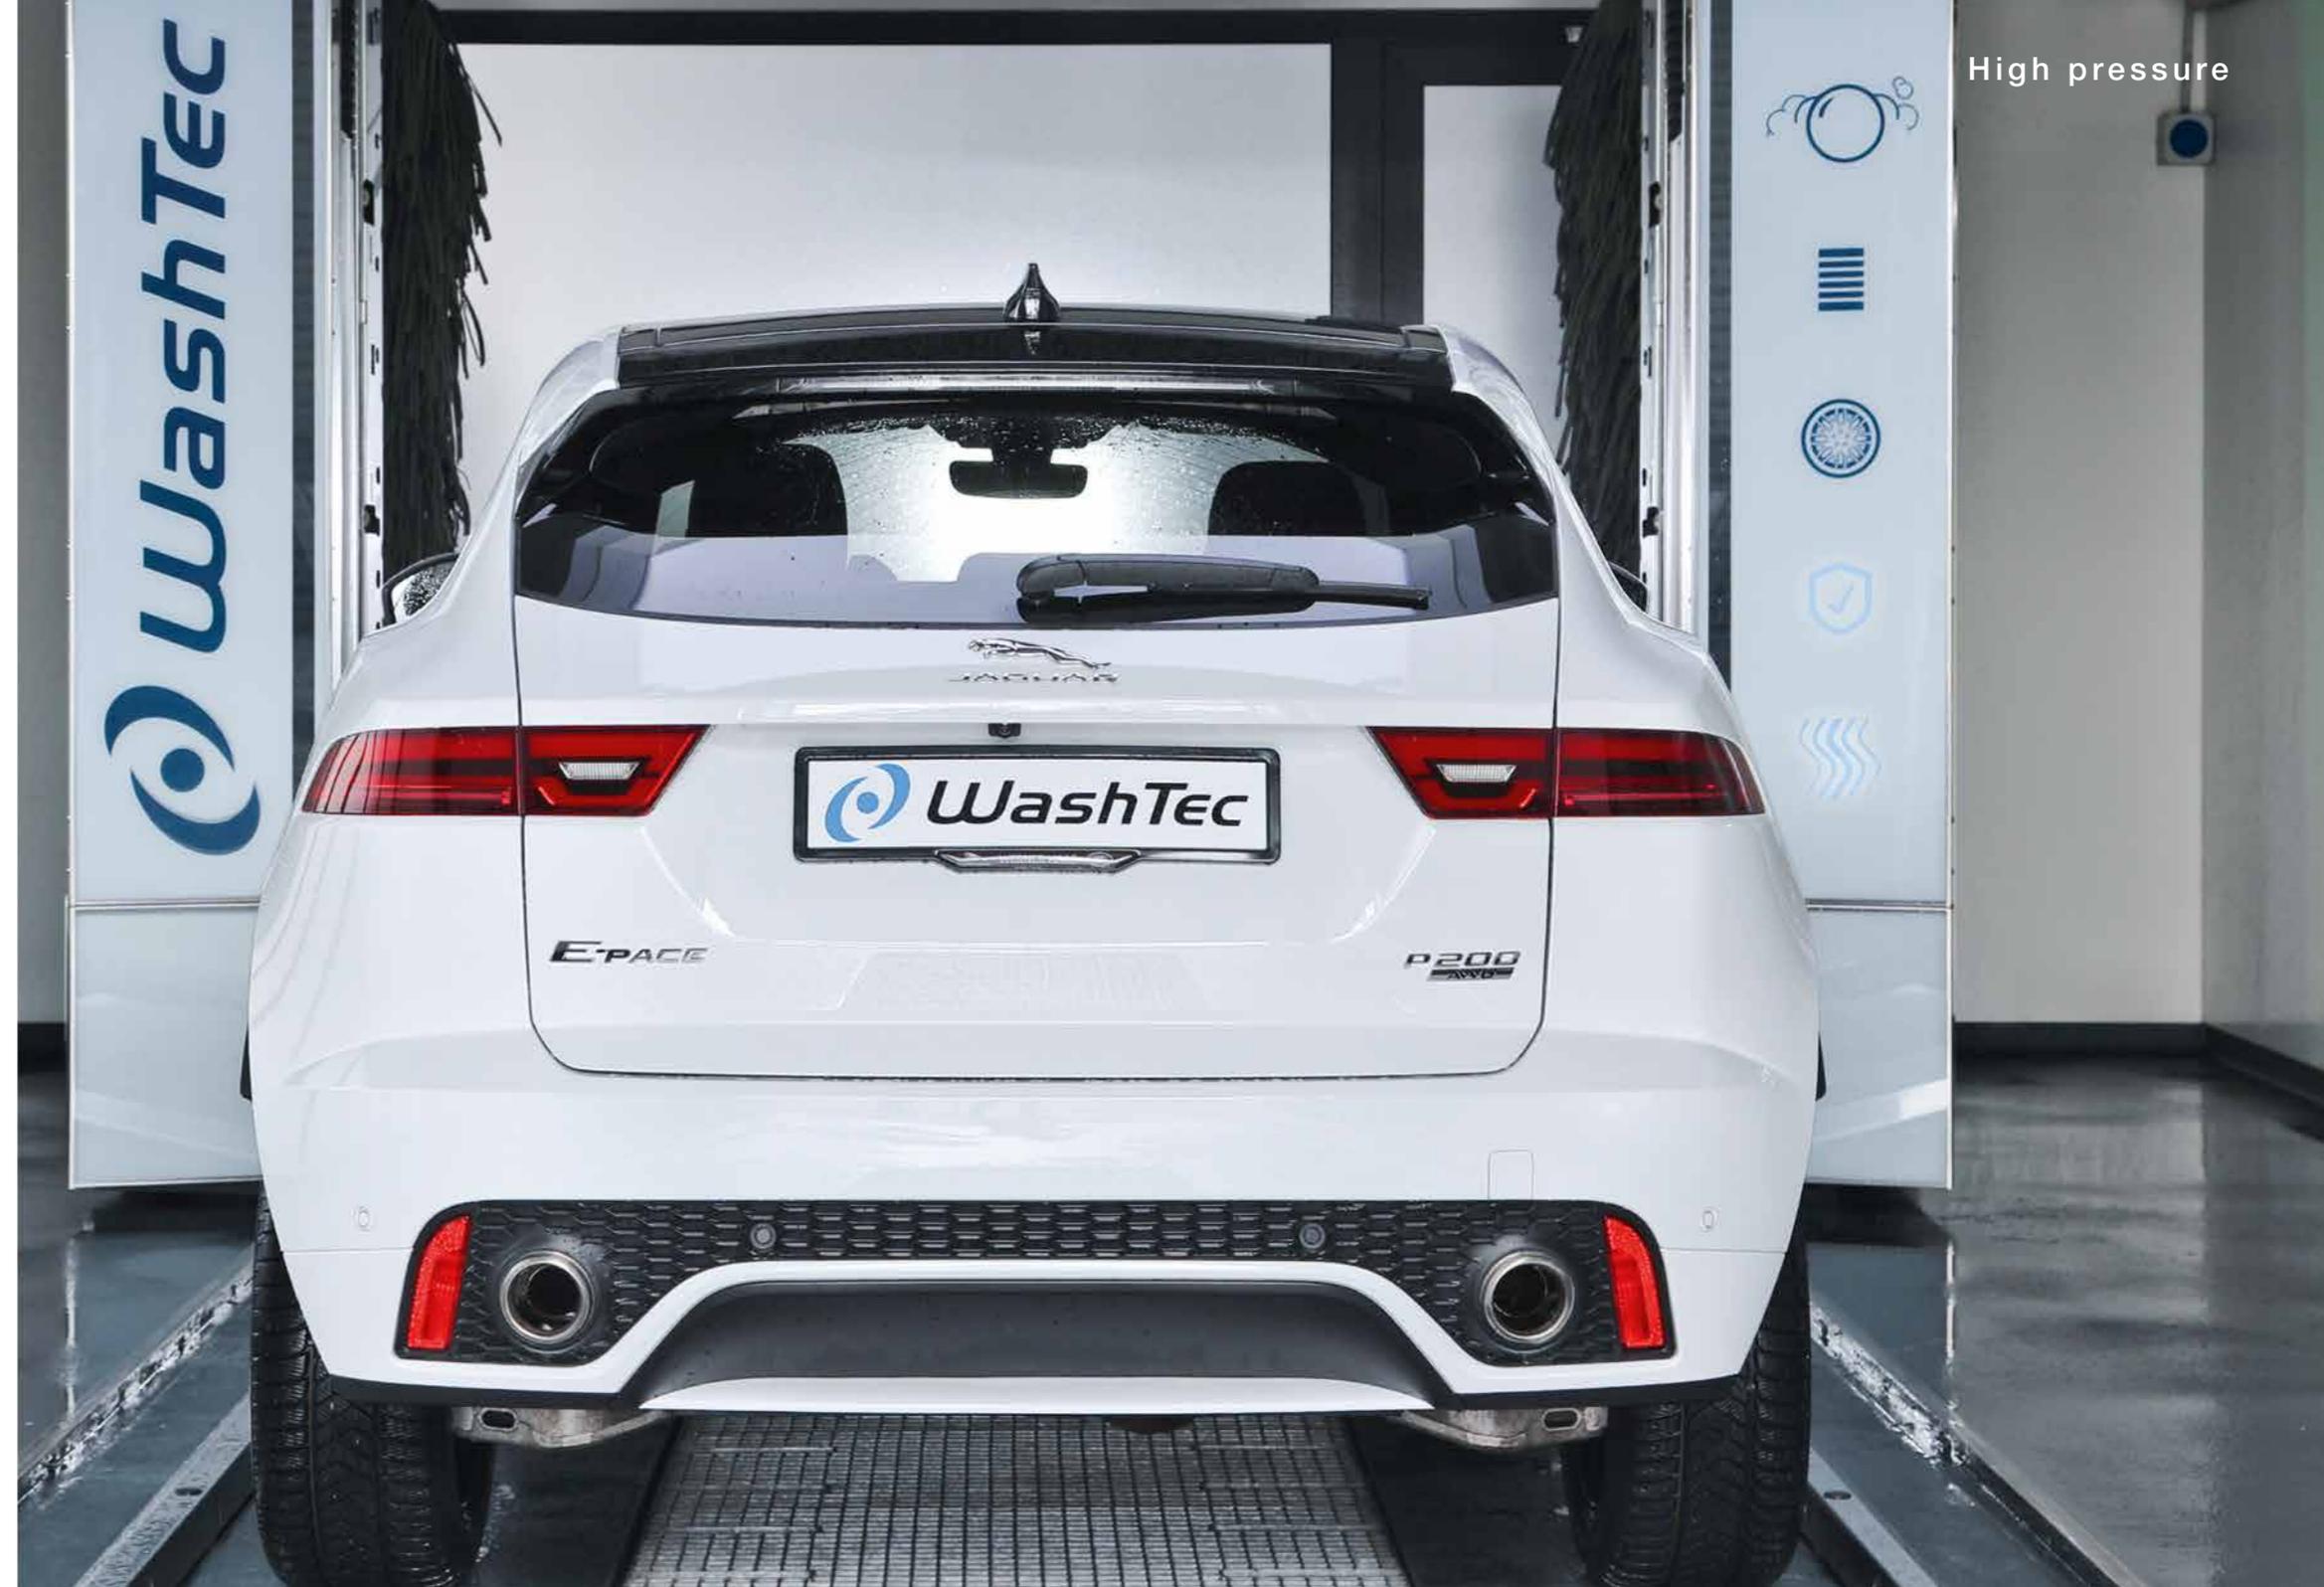

High pressure.

Thanks to powerful high-pressure, WashTec SmartCare ensures gleaming washing results, even with extremely dirty vehicles.

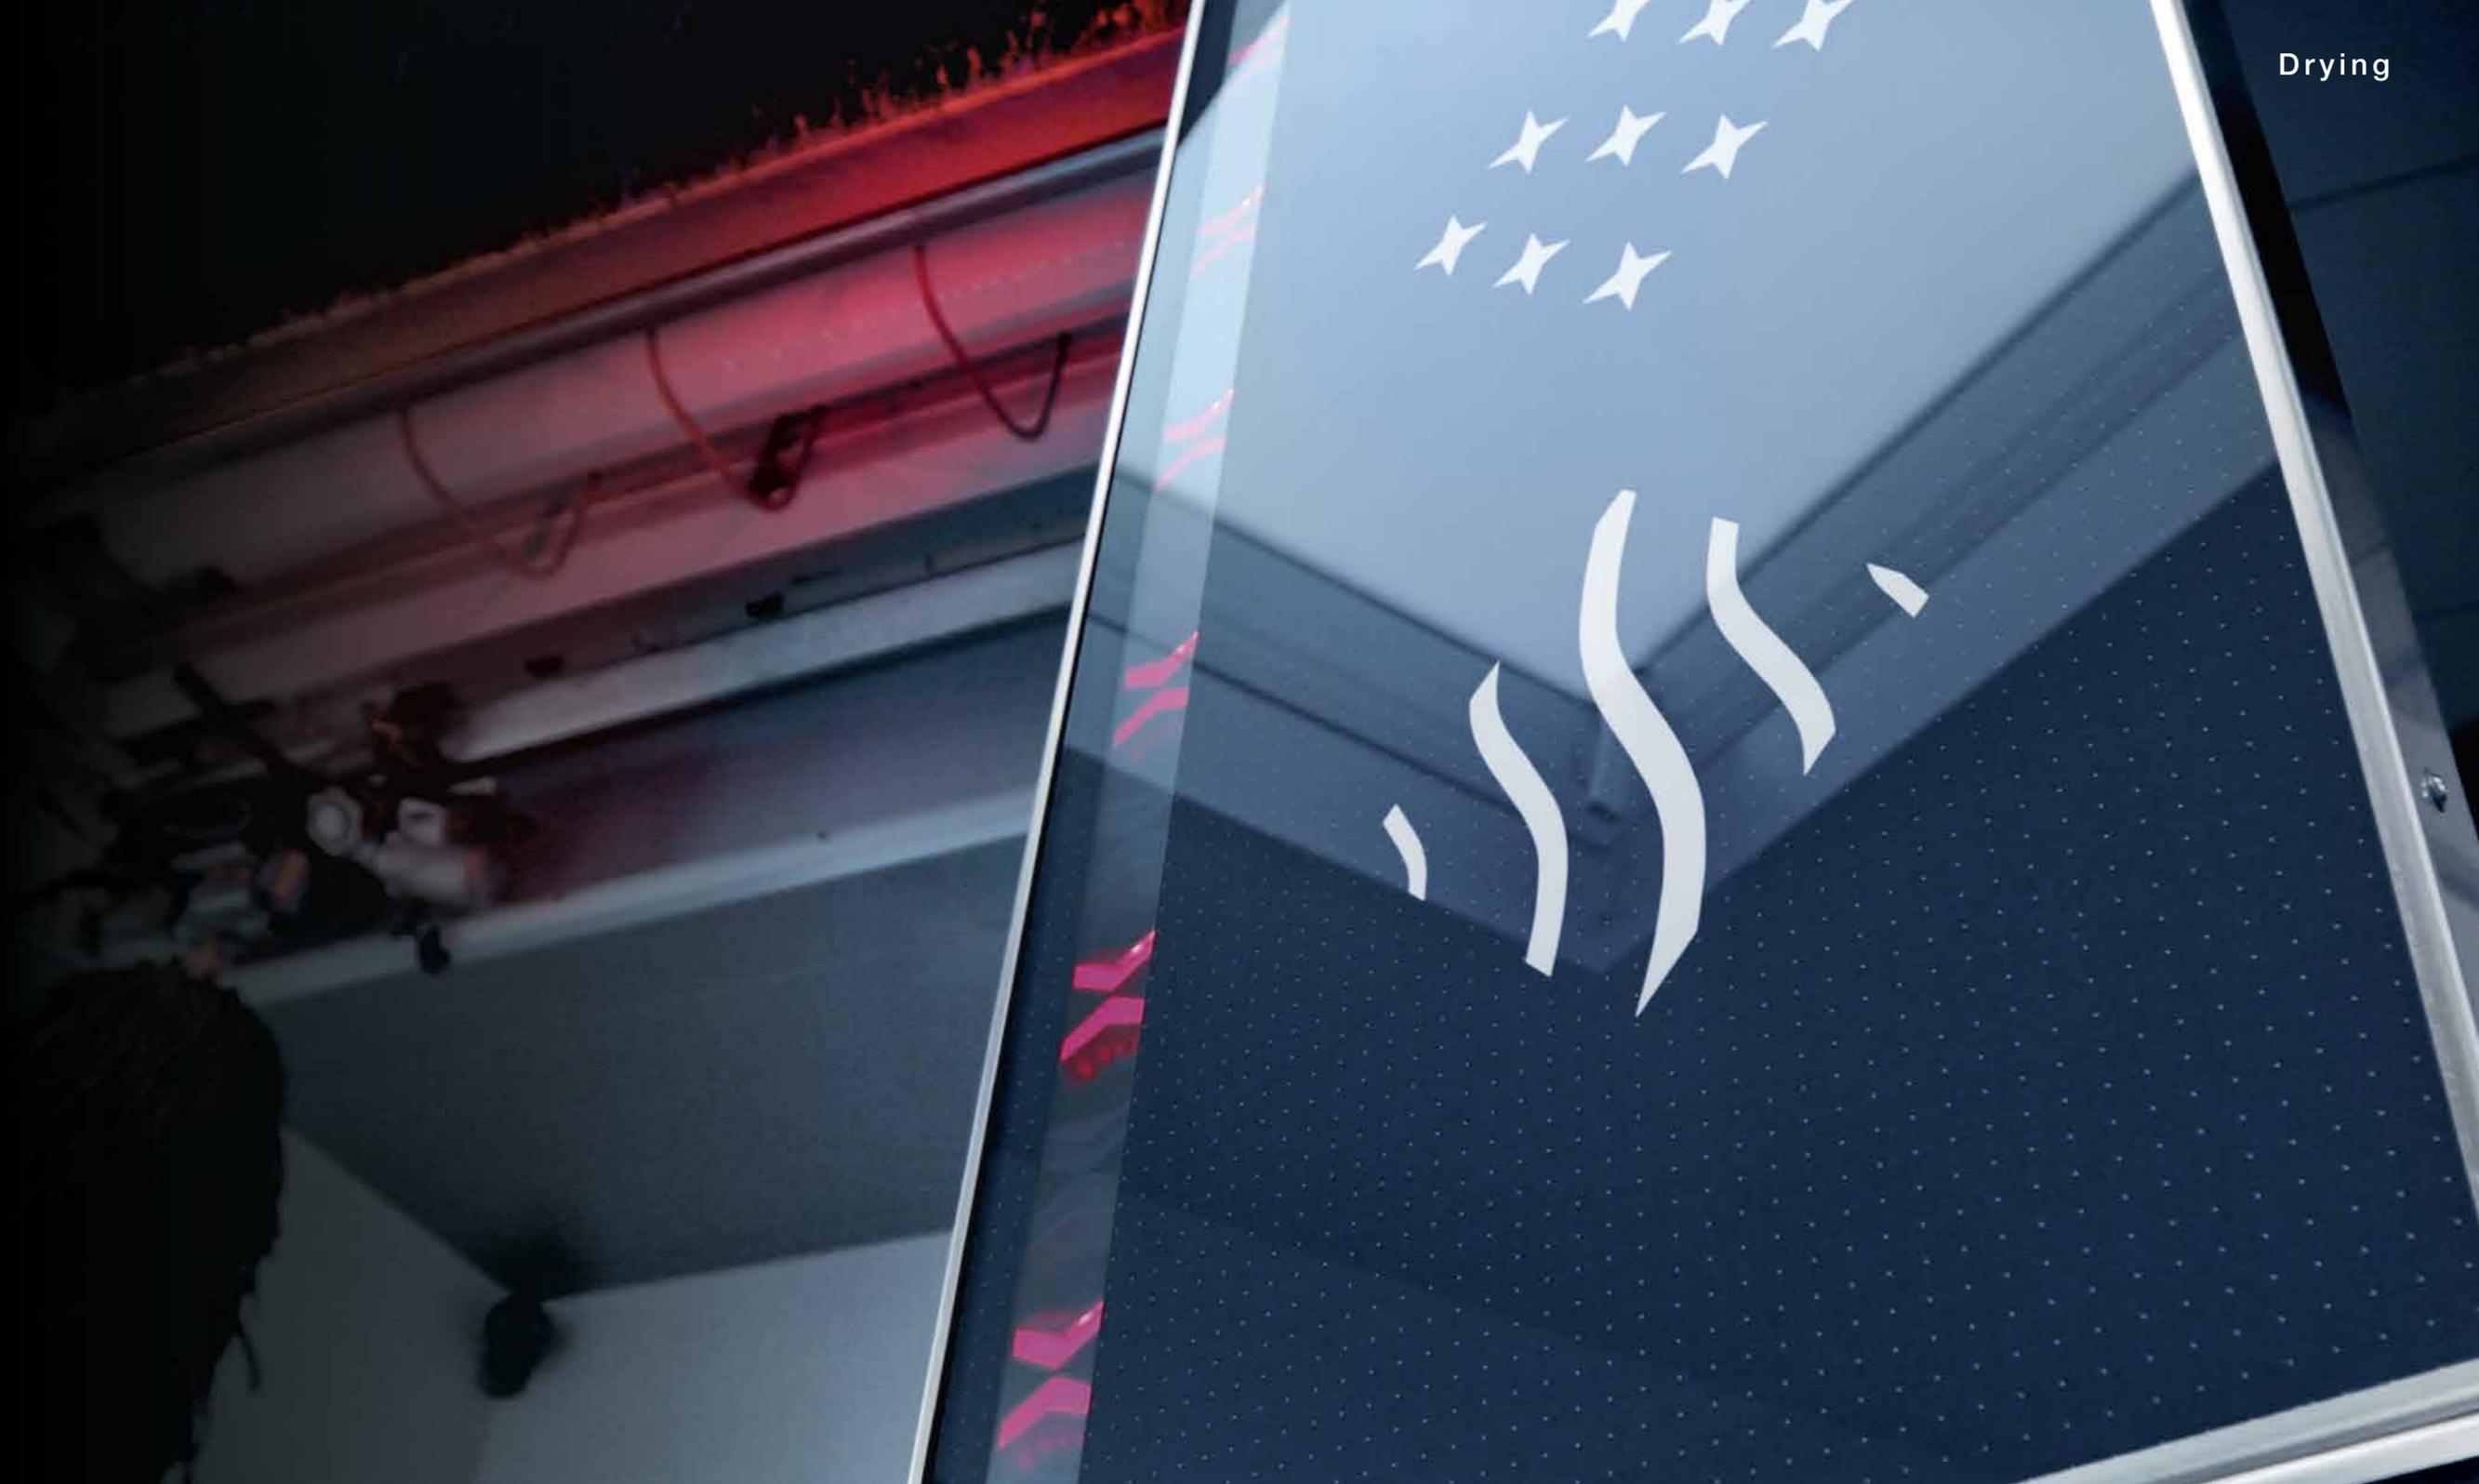

The optimised TurboNozzles – WashTec SmartCare's rotating spot spray nozzles – ensure optimum pre-cleaning with a powerful high-pressure jet. With pinpoint accuracy in the front, rear and in the sill areas.

And the perfect spraying angles ensure a high-pressure wash all-over, efficiently and with outstanding results.

Smart.
Thanks to flow-optimised
dryer.

What does more efficient drying actually mean? Quite simply – with a flow-optimised dryer and maximum efficiency, WashTec SmartCare dries more effectively than ever before. And that means even more satisfied and loyal customers.

Drying.

WashTec SmartCare exploits the full potential of the blower motors even when drying.

Improved air flow and precise contour tracking ensure perfect drying results for all vehicle shapes. We call this high performance with maximum efficiency.

For your customers this means: they experience an outstanding drying result immediately after the car wash. And you benefit from enthusiastic and loyal customers.

Drying

Service,
as you need it –
nationwide and
tailored to your needs.

WashTec offers you the largest manufacturer service network in the industry. Around 50 service engineers look after your systems in the UK. Regular and thorough maintenance saves cost-intensive repairs and long downtimes. With our tailor-made maintenance contracts, you benefit from long-term investment security and high availability of your system.
