

A blue-tinted photograph of a car being washed in a tunnel. Large, dark, brush-like rollers are positioned above the car, which is covered in white soap suds. The car is on a conveyor belt, and water is dripping from its surface. The background shows the structure of the wash tunnel.

WashTec

SoftCare SE

Simply reliable and high-performance

 **WashTec**

SoftCare SE

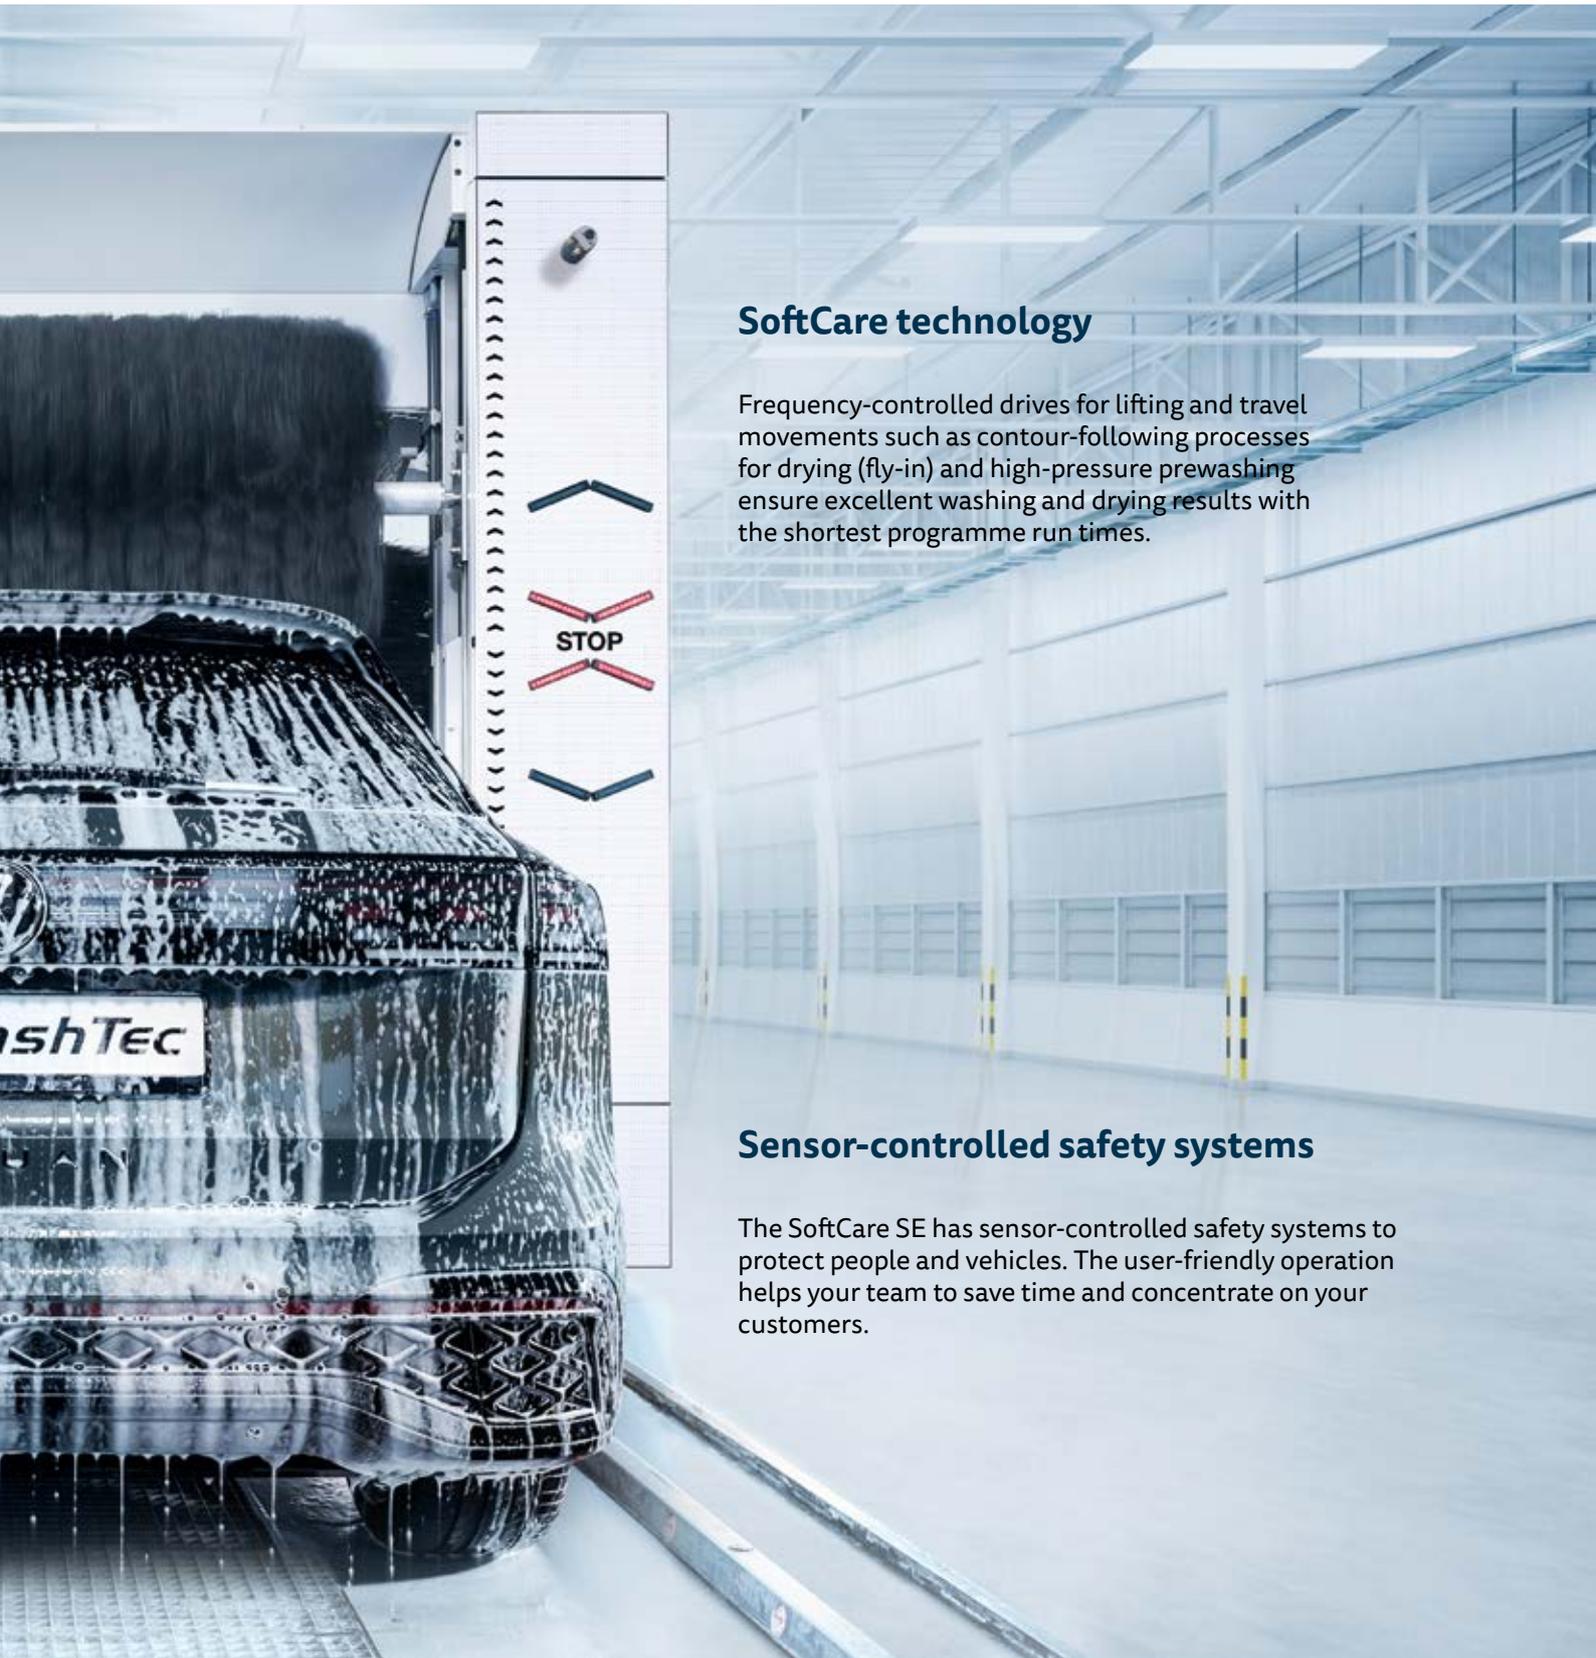

Washing quality that impresses

Effective cleaning with SofTecs

Thanks to the high-quality SofTecs brushes, you can be sure of gentle and effective cleaning. A cleaning that is gentle on paintwork and surfaces.

SoftCare SE is the economical solution for reliability, efficiency and quality in washing operations. With intelligent control, resource-saving processes and flexible extensions, the gantry system is the right choice for today's challenges such as larger vehicle sizes and increasing demands on wash quality – even in car dealerships.

SoftCare technology

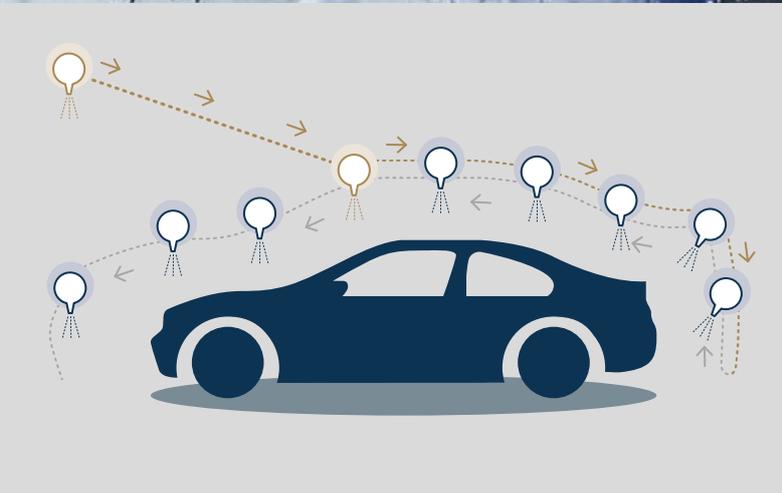

Frequency-controlled drives for lifting and travel movements such as contour-following processes for drying (fly-in) and high-pressure prewashing ensure excellent washing and drying results with the shortest programme run times.

Sensor-controlled safety systems

The SoftCare SE has sensor-controlled safety systems to protect people and vehicles. The user-friendly operation helps your team to save time and concentrate on your customers.

SoftCare SE

Outstanding washing results

High-pressure washing

Effective soil removal right from the pre-wash stage: The high-pressure pre-wash on the sides and roof adapts the water jets precisely to the vehicle contours. Even hard-to-reach areas are cleaned thoroughly.

Precise dosing of chemicals

The SoftCare SE offers you numerous chemical dosing options. Precisely dosed cleaning chemicals achieve maximum cleaning results with minimum environmental impact.

Time-saving fly-in drying

Fly-in stands for time savings and faster drying. The vehicle contours are saved during washing (memory contour). The SoftCare SE can then use this information during drying and work faster. For example, the dryer is lowered faster in the direction of the vehicle roof as the car wash advances.

WashTec

Functional design

Thoughtful construction

With a wash height of up to 2.90 m and a width of up to 2.58 m, it is ideally equipped for new vehicle generations—from SUVs to vans.

Optimum functional dimensions

Parameter	Values
Machine height	2,25 m
	2,40 m
	2,50 m
	2,60 m
	2,70 m
	2,80 m
2,90 m	
Machine width	2,38 m
	2,58 m

The SoftCare SE impresses not only with its performance, but also with its thoughtful, functional design – clear, modern, and systematically focused on efficiency.

Four colour options

SmartService+

Ready for the future with smart all-round service

As the market leader with the densest service network in Europe, WashTec customers can count on reliable support. With SmartService+, we offer operators maximum investment security for new systems – in the basic package at an attractive monthly price and with flexible additional options.

Basic services

Repair and fault clearance

All service technician deployments for necessary fault clearance and repairs, incl. travel expenses.

Service parts supply

All service parts required for fault clearance and repairs, excluding consumables.

Machine maintenance

Annual inspection, adjustment of mechanical parts, development of preventive measures.

Remote service diagnostics

Quick and direct fault clearance of systems by telephone and remote support.

mywashtec.com

mywashtec.com is the intelligent platform for digital car wash management that gives you full control over your car wash systems. All relevant data – from wash and sales statistics to consumption values – is displayed in real time.

my.carwash

Keep track of everything—anytime, anywhere: get automatic reports on wash figures, monitor the system status in real time, and receive immediate notifications in the event of breakdowns or inactivity.

my.shop

Order spare parts and washing chemicals conveniently online.

mywashtec.api

Integrate your operating data seamlessly into internal systems.

Green Car Care

100 % performance and sustainability

Customers now also expect sustainable, environmentally friendly solutions when it comes to car washing. We therefore work continuously on developing and optimising our washing chemicals with the environment in mind. And prove that committed environmental protection and perfect washing performance are not mutually exclusive.

Green Car Care – your sustainable success

Independently certified: SGS Institut Fresenius regularly tests our TecLine product line. With Green Car Care, you have a completely sustainable range of cleaning products, naturally with leading washing performance from the market leader.

Maximum customer satisfaction – the most sustainable argument

With the award-winning AUWA products, you have the best sales arguments: Show with Green Car Care that you understand what your customers want. And use our innovative washing chemicals for sustainable business success.

Consistently sustainable – consistently innovative

We develop innovative products that meet the high demands of customers and operators in our own laboratories. For many years, we have consistently focused on environmentally friendly and sustainable solutions that both optimise washing performance and reduce the ecological footprint.

Benefit from the perfect combination of state-of-the-art technology, high-quality washing materials and the best washing chemicals.

WashTec – your strong partner for the future

WashTec is the world's leading provider of vehicle washing technology and has been a reliable partner for car wash operators for 60 years. From the initial idea to successful implementation: WashTec supports you along the entire value chain with advice, technology, financing and service from a single source.
