

A perspective view of a car wash tunnel. Two parallel metal guide rails run down the center of the tunnel. The rails are illuminated with a sequence of lights: red at the front, transitioning to pink, and then blue towards the back. Large, dark, brush-like rollers are visible on either side of the rails. The background is a bright, hazy light at the end of the tunnel. The text "StarTrack" is in the top right corner.

StarTrack

“How do I make my car wash both more attractive and safer?”

With the illuminated
StarTrack guide rails.

StarTrack guide rails: the best-looking path into the car wash.

Show your customers the way, and enhance their experience before they even enter the car wash: the colour-illuminated StarTrack guide rails increase

the attractiveness of your car wash and help to facilitate the correct positioning of your customers' vehicles into the car wash.

How it works:

The illuminated guide rails on both sides of the car wash conveniently show your customers the way into the portal. They help customers enter at the right angle and correctly position the vehicle. The row of integrated sequential, multicoloured LED lights guide your customers safely through the process. From entering (sequential green lights), through positioning (permanent red light), to exit (sequential green lights).

If your customers drive too far into the portal, it lets them know with red reverse sequential lights. The high quality stainless steel design with a bevelled profile cross section protects the rim and prevents signs of wear over time.

Your benefits with StarTrack:

- **A more attractive car wash experience:** the LED illumination attracts attention and creates a unique lighting atmosphere during the washing process.
 - **An entry and positioning aid:** various illumination patterns and colours guide your customer safely through the entire process.
 - **Effective rim protection:** high quality stainless steel rails with an angled profile cross-section offer effective protection against wear.
 - **Competitive advantage:** StarTrack increases the overall appeal of your location and is a real attraction for customers – particularly in combination with FoamSensation.
-

Car washing goes by the name WashTec. The world over.

Present in more than 70 countries.

More than 1,700 employees are designing the future of car washing with us, including more than 600 service technicians.

More than 35,000 machines installed.

2.75 million vehicles a day are washed with WashTec all over the world!

Over 50 years of innovation leadership.

We set the standards in the car wash business – and actively drive the market forward.
